RE: DLA Land and Maritime  
Science Applications International Corporation

To Whom It May Concern:

This letter is to introduce Science Applications International Corporation (SAIC), our Industrial Product Support Vendor (IPV) supply chain integrator, and partner in providing streamlined logistics support to our military customers with respect to requirements for maintenance, overhaul and repair of certain weapons systems at the following sites:

Anniston Army Depot (ANAD), Anniston, Alabama  
Red River Army Depot (RRAD), Texarkana, Texas

This logistics support partnership generally includes spare parts and industrial hardware which are stored at or near the point of use, and are commonly referred to as "Pre-Expended Bin (PEB) Stock, or "Bench Stock." Additionally, SAIC will support worldwide demand customer requirements on some of the items they supply to ANAD and RRAD.

IPV contract, SPM7LX10D9006, was awarded by DLA Land and Maritime to SAIC, following evaluation of proposals submitted pursuant to solicitation SPM7LX09R0090. SAIC will act as the DLA Land and Maritime source of supply for a large number of the PEB items required by our customer, and will perform numerous supply chain management functions on behalf of this Center. The customer requirements covered by the contract will be procured with a hybrid method of traditional processes and commercial integrator processes. As an "integrator" our IPV must supply some of the material from their commercial sources and other material/NSNs thru DLA traditional supply channels. The contract is a fixed-priced indefinite quantity contract with an economic price adjustment provision, and was negotiated under Part 12 of the Federal Acquisition Regulation (FAR) using commercial practices. The base period is four years with two 2-year options for a maximum performance period of eight years.

The purpose of this letter is to advise you of this unique contract and to request that you respond to the IPV and its subcontractors in the same manner as you would respond to the United States Government through any of its Department of Defense (DOD) agencies.

Thank you in advance for your cooperation and assistance in making the DLA Land and Maritime IPV Program a success.

Sincerely,

LINDA J. KELLY  
Contracting Officer
